ready for tomorrow

STATE OF CALIFORNIA

USEFUL · AI SOLUTIONS CATALOG

Proven AI for statutory clocks and intake backlogs.

Your programs have Public Records Act deadlines, application backlogs and correspondence that don't wait for a modernization plan, and no spare team to build AI from scratch.

23+ years of State of California work · 300+ projects for the State of California

The **AI Solutions Catalog** gives you solutions already running for a California state agency, deployed into your own cloud under your identity and security, configured to your data, and run for you under **11:59 Operate**. Deployment is a fixed fee, quoted before you order, through the contract vehicle you already have.

THE CATALOG

Solutions departments start with

SOLUTION	WHAT IT DOES
PRA Accelerator	California Public Records Act requests end to end: intake, search, responsiveness review, redaction support, response assembly and deadline tracking. Records officers keep every disclosure decision.
IDP++ document intake	Applications, forms, correspondence and case files classified, extracted and validated at volume, with an audit trail of every decision. In production at a California state agency.
Knowledge search	Answers with citations across regulations, policy manuals and program documents.
ERP exception queues	Agents that research and resolve or escalate exception-queue items, with a record. First deployments in progress.
Database migration (ADAM)	Assesses compatibility, risk and effort, then moves legacy databases to managed services on AWS.

HOW IT WORKS

Two steps done before you order, three done with you

DONE BEFORE YOU ORDER

Proven in production
Built for a real client
Edge cases handled
Test set included

→

Security pack
Architecture reviewed
Audit trail built in
Data stays in your cloud

DONE WITH YOU

→

Deploy
Into your AWS or Azure environment, on your identity

→

Configure
Connect your data; tune to your forms, rules and queues

→

Go live
Validated on your real cases; staff trained on the job

Then 11:59 Operate keeps it current, tuned and supported. You own the deployment, the data and the option to run it yourselves.

WHY IT'S FASTER

Starting from scratch is the slow way

BUILD IT YOURSELF	DEPLOY FROM THE CATALOG
A long build before anything reaches production	A working deployment, scoped and quoted up front
Edge cases learned the hard way	Edge cases already handled; the test set comes with it
Security review from a blank page	A reference architecture already reviewed by regulated clients
Each use case starts over	Every solution shares the same governance and audit pattern

OWNERSHIP

We run it. You own it.

- **Pre-built and maintained by 11:59.** the agents and pipelines, the test harness, governance and audit trail, and the security reference architecture
- **Configured to you.** connections to your systems, your document types and rules, your approval thresholds, your identity and roles
- **Owned by you.** the deployment in your cloud, your data (which never leaves your environment), the outputs and audit record, and the option to run it yourselves

BUYING

How you buy it

	WHAT IT IS	HOW IT'S PRICED
AI Rapid Scan	Your backlogs, systems and data, ending with the solution to deploy first and its quote	Fixed fee, scoped and quoted before we start
Deployment	Deploy, connect, configure, validate on your real cases, train staff	Fixed fee per solution
11:59 Operate	We run the solution in your cloud: updates, tuning, monitoring, support	Monthly or annual per solution, by volume
Software through SLP	PRA Accelerator, IDP++ and other 11:59 software by SKU	Through an authorized SLP reseller

> *Proven solutions from a peer agency, in your cloud, bought through the vehicle you already have.*

Next step: an AI Rapid Scan

A short, fixed-scope look at one backlog, your cloud and your data sources. You leave with the solution to deploy first and a fixed deployment quote.

Contract through **CMAS 3-24-01-1044** or the **TDDC MSA #5-22-70-25-189** as a SOW under an existing agreement. 11:59 software is also available through the **California Software Licensing Program (SLP)**.
