11:59
ready for tomorrow

COMMERCIAL

USEFUL · AI SOLUTIONS CATALOG · ERP EXCEPTION AGENTS

Invoice exceptions found and fixed, with your team approving in one click.

Misspelled supplier names, duplicates and missing PO numbers hold up payment, and someone on your team spends the afternoon chasing each one.

Trusted by **TaxAudit, Horrocks, Battelle Energy Alliance, Navy Mutual Aid Association** and **Allmoxy** · **89+ NPS, measured every year**

ERP Exception Agents are 11:59's agentic AI for exception handling. They scan new transactions against your ERP, find missing and incorrect data, and **recommend the fix with the evidence**. A person approves every change. Under **11:59 Operate**, we run and tune them for you.

HOW IT WORKS

Agents find the problem and recommend the fix

1. Invoice in
A new invoice lands in your ERP and triggers the agents.

2. Scan
Agents check it against your supplier, order and payment tables for inconsistencies.

3. Find
Misspelled supplier names, duplicates, missing PO numbers and mismatched amounts.

4. Recommend
Each exception comes with the evidence and a recommended fix, such as merging two supplier records.

5. Approve
A person approves the fix in one click, or sends it back with a note.

6. Record
Every finding, approval and change is logged with who made it.

WHERE IT HELPS

Wherever transactions need to match

WORK	EXCEPTIONS AGENTS HANDLE
Accounts payable	Supplier names that don't match, duplicate suppliers, missing or wrong PO numbers
Procurement	Orders and invoices that don't reconcile, quantities and prices that differ
Finance and accounting	Incomplete records, coding errors, data that drifts between systems
HR and supply chain	Records that fall out of step between the ERP and other systems

People make the decisions: agents recommend; your team approves every change to the ERP.

BUILT ON AWS

Runs in your AWS account, next to your ERP

Agents
Amazon Bedrock agents with tool calling, using Amazon Nova models.

Data
Amazon Aurora and Amazon DynamoDB for working data, AWS Lambda for each check.

People in the loop
Agents ask for a person's decision whenever a fix changes a record.

Diagnostics
Every query, finding and fix is logged for audit.

BUYING

How you buy it

	WHAT IT IS	HOW IT'S PRICED
AI Rapid Scan	Your exception volume, ERP and data, ending with a fixed deployment quote	Fixed fee, scoped and quoted before we start
Deployment	Connect to your ERP, configure your rules, validate on your real exceptions, train your team	Fixed fee, quoted before you order
11:59 Operate	We run and tune the agents, with a monthly report on exceptions handled and staff hours returned	Monthly or annual, tiered by volume
AWS funding	AWS partner funding programs may offset part of the deployment	Confirmed during scoping

WHY 11:59

Agents built and run by the same team

- **3x faster to production with a proven solution vs. a custom build.** Every AI and cloud project delivered since 2022, and 89+ NPS, measured every year.
- **Safe to scale.** Every agent has an owner, tests and an audit trail, and runs in your own AWS account. AWS Advanced Tier Partner with the AWS Generative AI Competency.
- **First deployments now underway.** Open to a small number of early clients, with the scope fixed before we start.

> *Agents do the chasing. Your team makes the call.*

Next step: an AI Rapid Scan for exception handling

We look at your exception volume, your ERP and your data, and return a fixed deployment quote. Scoped to the effort and quoted before we start. See it working in the AI Lab at 1159.ai.

Fixed scope and fee, quoted before you start. 11:59 services are also listed on **AWS Marketplace**, and AWS funding programs may offset part of the cost.
