USEFUL · AI SOLUTIONS CATALOG · IDP++

Client documents in, clean data out, and your team only touches the exceptions.

Your team receives tax notices, financial statements, applications, contracts and correspondence all year, and the people keying them in are often your most experienced staff.

Trusted by **TaxAudit, Horrocks, Battelle Energy Alliance, Navy Mutual Aid Association** and **Allmoxy** · **89+ NPS, measured every year**

IDP++ is 11:59's intelligent document processing solution with generative AI. It reads complex, multi-format document packages, extracts and checks the data, and routes each case, inside your own AWS environment. **Your staff handle only what needs a person**, and every decision is on the record. Under **11:59 Operate**, we run and tune it for you.

HOW IT WORKS

Documents in, checked data out, people on the exceptions

1. Intake
Takes documents from portals, email, scans and uploads, and splits multi-document packages.

2. Classify
Identifies each document type, such as notices, statements, forms and correspondence.

3. Extract
Pulls names, dates, amounts and tables into your systems, even from poor scans.

4. Validate
Checks extracted data against your rules and prior records, and flags what doesn't match.

5. Route
Sends each case to the right team with a short summary, and anything uncertain to a person.

6. Record
Logs every step, so you can show how each document was handled.

MORE THAN OCR

One flow for every format in the package

	STANDARD OCR AND IDP TOOLS	IDP++
What it reads	Mostly text documents and scans, sensitive to image quality	Multi-page PDFs, tables, images, audio transcripts and video captions in a single flow
What the AI does	Character recognition with some field extraction	Generative AI for classification, field extraction, table parsing, summaries and questions about each document
Getting started	Custom configuration and development before launch	Pre-built automations and a browser-based review screen; your rules and document types configured in the deployment
Growing it	Rework for each new document type	Modular: new document types and teams join the same build, with an API into your systems

Staff keep the judgment: they resolve the exceptions IDP++ flags and sign off on the client work.

SECURITY

Runs where your documents already live

Your environment
Your own AWS account, your identity provider, your retention rules.

Built on AWS
Textract, Bedrock, Lambda, AppSync and S3, serverless.

Least access
A U.S.-based team that doesn't need your production credentials.

Audit record
Every step logged with time and source.

IN PRODUCTION

Where it's running

- **TaxAudit.** Sorts, extracts and checks incoming client documents; staff review the exceptions.
- **A California state department.** Reads, checks and routes applications.

BUYING

How you buy it

	WHAT IT IS	HOW IT'S PRICED
AI Rapid Scan	Your volume, documents and systems, ending with a fixed deployment quote	Fixed fee, scoped and quoted before we start
Deployment	Deploy, connect, configure, validate on your real cases, train your team	Fixed fee, quoted before you order
11:59 Operate	We run and tune it, with a monthly report on volume, quality and staff hours returned	Monthly or annual, tiered by volume
AWS funding	AWS partner funding programs may offset part of the deployment	Confirmed during scoping

WHY 11:59

Built in production, not for a demo

- **3x faster to production with a proven solution vs. a custom build.** Every AI and cloud project delivered since 2022, and 89+ NPS, measured every year.
- **Safe to scale.** Every agent has an owner, tests and an audit trail, and runs in your own AWS account. AWS Advanced Tier Partner with the AWS Generative AI Competency.

> *Your documents, your cloud, and your people back on the work that needs them.*

Next step: an AI Rapid Scan for document intake

We look at your intake volume, document types and systems, and return a fixed deployment quote for IDP++. Scoped to the effort and quoted before we start. See it working first: four short IDP++ videos in the AI Lab at 1159.ai.

Fixed scope and fee, quoted before you start. 11:59 services are also listed on **AWS Marketplace**, and AWS funding programs may offset part of the cost.
