11:59
ready for tomorrow

STATE OF CALIFORNIA

AI SOLUTIONS CATALOG · PUBLIC RECORDS · PRA ACCELERATOR

Answer every records request on time, with the record to prove it.

Public Records Act requests keep growing in volume and scope. Agencies have 10 days to determine whether records are disclosable, with up to 14 more in unusual circumstances (Government Code §7922.535). From January 1, 2027, AB 1821 counts those as business days, but the work itself doesn't shrink.

300+ projects for the State of California · 23+ years of delivery for California departments

The **11:59 PRA Accelerator** (Public Records Act Request Accelerator) handles intake, triage, records search, citation-backed draft responses and redaction suggestions for every request, inside your own environment. It pairs a **knowledge map** of where your records live with **IDP++** document processing. **Records officers make every disclosure decision.**

HOW IT WORKS

Every request, start to finish, with staff deciding

1. Intake

Reads each request from email, your intake portal or a scan and captures requester, records sought, date ranges, format, received date and due date. No retyping.

2. Triage

Checks the request against your policy rulebook and suggests a path: respond, clarify, partial with redactions, or decline. Staff choose.

3. Search

The knowledge map shows which of your systems hold each kind of record, so every relevant source is searched at once. Analysts see the queries and can edit and re-run them.

4. Draft

Drafts the response letter with a citation to the source behind every statement, in your agency's format.

5. Redaction

IDP++ reads each record, flags personal information and possible exemptions and suggests exact redactions with the reason. Staff accept or reject each one.

6. Delivery

Assembles the response and attachments, sent from your email client or a dedicated PRA inbox.

HUMAN IN THE LOOP

What the tool proposes, and what stays with your staff

THE PRA ACCELERATOR	YOUR RECORDS OFFICERS
Logs the request and tracks the statutory deadline	Decide whether to ask the requester to clarify
Finds and ranks candidate records, with sources	Decide what is responsive
Suggests redactions and exemptions, with reasons	Make every exemption and redaction decision
Drafts the response and assembles the release	Approve and send

Every step is logged with user, time and source, so the agency can show how each determination was made.

BUILT FROM TWO 11:59 SOLUTIONS

One knows where records live. The other reads them.

Knowledge map

A governed map of your systems, record types and the people who own them, so the search starts in the right places instead of everywhere.

IDP++

Generative AI document processing that reads, checks and routes every page, built for a California state agency.

SECURITY AND RESPONSIBLE AI

Runs where your records already live

Your environment

Deployed in your cloud (AWS, Azure or Google) or on premises. Hosting by your team, your enterprise IT agency or 11:59.

Access control

Single sign-on and multi-factor authentication, permissions checked on every action, time-limited links to files.

Audit trail

Every request, search, suggestion and decision logged with user, time and source.

Your data stays yours

Customer data is never used to train AI models or shared with AI providers for training.

OPTIONS

Sized by the number of connected data sources

SLP SKU	DATA SOURCES	EVERY TIER INCLUDES
1159-PRA1	Up to 5	SSO and MFA; AI-assisted and manual redaction; compliance and defensibility features; integration with your third-party intake portal
1159-PRA2	Up to 10	Same as above
1159-PRA3	Up to 15	Same as above
1159-PRA4	Up to 20	Same as above, plus hypercare for the initial deployment

Included in every deployment: configuration to your rules, integration with your data stores, file systems, email and intake portal, organizational change management and training, and project management. List prices are published in the 11:59 SLP catalog at 1159.ai; your price is set through the SLP reseller.

WHY 11:59

Built for California records work

- **Built for the CPRA.** Built around the Act's deadlines and exemptions, on IDP++, document processing built for a California state agency, and the 11:59 knowledge map.
- **Governed like government.** 23+ years of State of California work; AWS Advanced Tier Partner with the AWS Generative AI Competency.

> *Every request on time, every decision made by your staff, and every step on the record.*

Next step: an AI Rapid Scan for public records

We look at your request volume, data sources, intake channels and deadlines, and return the right PRA tier and a deployment plan. Scoped to the effort and quoted before we start. Watch the 49-second walkthrough in the AI Lab at 1159.ai.

Contract through **CMAS 3-24-01-1044** or the **TDDC MSA #5-22-70-25-189** as a SOW under an existing agreement. 11:59 software is also available through the **California Software Licensing Program (SLP)**.
