ready for tomorrow

COMMERCIAL

SAFE · STANDARDIZED AI ADOPTION

From pilot to production, safely.

You bought the licenses, and your people built pilots that work. Too many of them then sit waiting on a security review, a connection to your systems and someone to own them.

Trusted by **TaxAudit, Horrocks, Battelle Energy Alliance, Navy Mutual Aid Association** and **Allmoxy** · **89+ NPS, measured every year**

Standardized AI Adoption gives your firm one standard for AI, sized for a small IT team. You get a governance model your clients can see, **rescue engineers** who bring what your people already built under it and take your most promising pilot to production, and **forward deployed specialists** who move one practice at a time onto governed agents. Then **11:59 Operate** runs it.

WHERE PILOTS STALL

Your people built it. Here is what stands between it and production.

WHERE THE PILOT WAITS	WHAT 11:59 DOES
A security review nobody owns	Rescue engineers bring it under one standard, with identity, permissions and an audit trail
A connection to the systems you run on	It is connected properly, instead of running on exports and copy and paste
Someone to own it	A named owner sets the rules, and 11:59 Operate watches it once it's live

HOW IT FITS TOGETHER

The operating model

Firm leadership and practice leaders
Set the roadmap and the outcome each practice must deliver; re-rank after every cycle

Governance model your clients can see
Approved uses · client-data rules · an owner and autonomy level for every agent · a record of what each one does

Company brain
Policies, procedures and records in one governed knowledge graph; every agent answers from the same source

Rescue engineers
Take what staff already built from pilot to production

Forward deployed specialists
Move one practice at a time onto governed agents

Enablement
Train staff to build small agents safely, inside the approved patterns

Your existing tools: Copilot, Claude, ChatGPT or your cloud, on open-weight or closed models

11:59 Operate runs what's live

PILOT TO PRODUCTION

How a pilot earns production

Pilot → Assisted → In production

Every agent starts as a human-led pilot. It moves to assisted, then into production, only after a security review and its owner's sign-off. Rescue engineers do this for the best of what your people already built; forward deployed specialists do it for new agents.

HOW IT RUNS

From kickoff to agents in production

1
Set direction
Governance model agreed with leadership; inventory of what your people built.

2
First pilot live
Rescue engineers take your most promising pilot to production.

3
First practice
Specialists move one practice onto governed agents, with staff trained along the way.

4
Run it
11:59 Operate runs the agents and reports monthly.

Scope and length are set before we start, based on how many practices you want to move.

BUYING

How you buy it

	WHAT IT IS	HOW IT'S PRICED
AI Rapid Scan	The AI already in use, what your people built, and the first pilot to take to production	Fixed fee, scoped and quoted before we start
Standardized AI Adoption	Governance model, your most promising pilot taken to production, and one practice moved onto governed agents	Flat monthly fee for the term
Additional practice	The next practice moved by the same team	Flat monthly add-on
11:59 Operate	We run the agents, with a monthly report	Flat monthly fee on an annual term

WHY 11:59

Enterprise discipline, sized for a firm

- **Safe to scale.** Every agent has an owner, tests and an audit trail. 23+ years running systems that can't afford to be wrong, now applied to your AI.
- **Your cloud, your data.** Everything runs in your AWS or Azure environment, under your identity provider.
- **Proven partner.** AWS Advanced Tier Partner with the AWS Generative AI Competency.
- **It's yours.** The governance model, patterns and trained people stay with you.

> *Your best pilot in production. Then the next one.*

Next step: an AI Rapid Scan

We look at the AI your people already use, what they have built, and the pilot to take to production first. Scoped to the effort and quoted before we start.

Fixed scope and fee, quoted before you start. 11:59 services are also listed on AWS Marketplace, and AWS funding programs may offset part of the cost.
