11:59
ready for tomorrow

STATE OF CALIFORNIA

SAFE · STANDARDIZED AI ADOPTION

One AI standard for every program, built with ITSD.

Your programs already use AI: Claude through the statewide agreement, Copilot, Poppy and tools staff built themselves. ITSD is asked to secure it and explain it to oversight bodies without slowing programs down.

23+ years of State of California work · **300+ projects for the State of California**

Standardized AI Adoption gives your department one way to build, govern and run AI: an executive roadmap, a Center of Excellence ITSD governs from, Rescue Engineers who bring staff-built AI under the standard, and forward deployed specialists who move program after program onto governed agents. Once agents are live, **11:59 Operate** runs them.

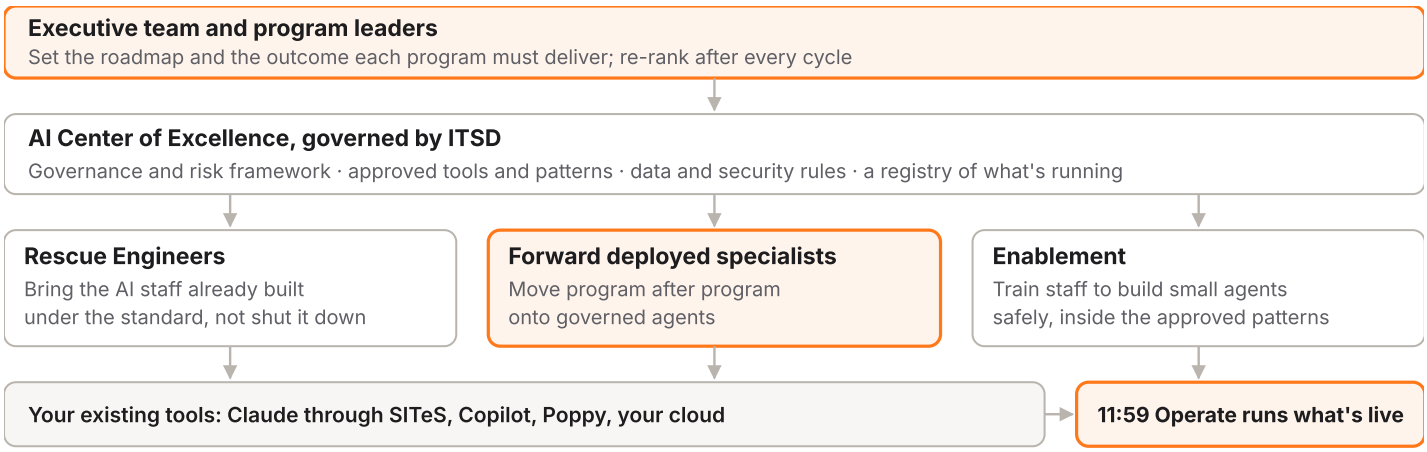

THE PROBLEM

Two ways AI adoption stalls in a department

LICENSES FOR EVERYONE	LOCKED DOWN UNTIL POLICY IS DONE
Shadow AI in every program: prompts, scripts and bots nobody governs	Programs build anyway, outside the controls, because the work doesn't wait
Pilots stop when the one person who built them moves on	Nothing ships while the policy is drafted
Risk ITSD can't see	Work that goes around ITSD

HOW IT FITS TOGETHER

The operating model

HOW IT RUNS

From kickoff to running it yourselves

1 Set direction
Roadmap with leadership; Center of Excellence chartered with ITSD; inventory of AI already in use.

2 First program
Specialists move the first program onto governed agents; key staff-built AI brought under the standard.

3 Scale
More programs, staff training and a steering review after each cycle.

4 Hand over
ITSD runs the Center of Excellence; 11:59 Operate runs the agents.

Program length is set during scoping, based on how many programs you want to move.

BUYING

How you buy it

	WHAT IT IS	HOW IT'S PRICED
AI Rapid Scan	The AI already running, the governance gaps and the first two programs to move	Fixed fee, scoped and quoted before we start
Standardized AI Adoption	The full program, contracted as a Managed AI Center of Excellence SOW	Flat monthly fee for the program term
Additional specialist team	A second team to move two programs in parallel	Flat monthly add-on
11:59 Operate	We run the agents the program built, or step down to advisory	Monthly, lower as scope transfers to you

WHY 11:59

Built with a California department

- **Built with a client, not in a workshop.** The model comes from an enterprise AI enablement engagement with a California state department.
- **Oversight without the gate.** ITSD governs AI without becoming the bottleneck.
- **Governed like government.** 23+ years of State of California work; AWS Advanced Tier Partner with the AWS Generative AI Competency.
- **It transfers.** The roadmap, Center of Excellence, patterns and trained staff are yours.

> *The capability to govern, fund and deploy AI across every program, with a model your own people run.*

Next step: an AI Rapid Scan focused on governance

With your executive sponsor and ITSD lead, we inventory the AI worth rescuing, sketch the Center of Excellence charter and pick the first two programs. Scoped to the effort and quoted before we start.

Contract through **CMAS 3-24-01-1044** or the **TDDC MSA #5-22-70-25-189** as a SOW under an existing agreement. 11:59 software is also available through the **California Software Licensing Program (SLP)**.
