

Simplify VMware Migration

Migrate with Confidence

Need to get to AWS quickly—without stretching your budget or disrupting your business? 11:59's Rapid Migration helps you move from on-prem, VMware, or hybrid environments with speed, security, and peace of mind.

Powered by AWS Application Migration Service (MGN), our approach avoids costly rebuilds or redesigns, delivering production-ready environments in weeks, not months.

How it Works

We combine automation with real-world experience. Every migration is led by AWS-certified professionals and follows a repeatable, proven process.

Why AWS?

When you move to AWS, you unlock:

Long-term cost savings—No hardware refreshes or licensing overhead.

Elastic scalability—Scale up or down without capacity planning.

Modern cloud services—Access to tools like S3, RDS, Lambda, and Bedrock.

Built-in security and compliance—Aligned with AWS best practices.

Future-ready infrastructure—A strong foundation for automation, AI, and innovation.

What's Included:

- Real-time block-level replication
- Automated cutover orchestration
- Zero impact to production systems
- Transparent pricing and delivery timelines
- U.S.-based team with 50+ AWS certifications

Most migrations complete in 6–24 weeks with predictable pricing and no surprises.

AWS partner funding may be available to offset your investment.

Why Migrate From VMware?

VMware environments are expensive, complex, and difficult to scale. Our fully managed migration makes it easy to:

- Exit aging data centers
- Eliminate VMware licensing costs
- Simplify infrastructure operations
- Migrate with limited internal resources
- Lay the groundwork for modernization or GenAI adoption

No code changes required.

What You'll Walk Away With

**Workloads fully migrated, tested,
and ready to run.**

**A secure scalable infrastructure
built to AWS best practices.**

**Clear documentation, hands-on
training, and knowledge transfer**

**Actionable next steps for
optimization and modernization**

Let's Get You Moving

Whether you're moving five servers or 500, we'll help you get to AWS quickly and securely—without the headaches. Our team stays with you every step of the way, so you're set up for success on day one.
